

Labeling and Kitting Overview

Singota Solutions offers product labeling and kitting services to the pharmaceutical, animal health, biotechnology, and medical device industries. These services include labeling/re-labeling of primary containers, secondary packaging, and kitting/re-kitting supporting:

- Pre-clinical studies
- Clinical trials
- Merger & Acquisition activities

The company specializes in small volume jobs needing quick turnaround with demanding specifications and customized requirements, and requiring manually intensive procedures to avoid tooling and expensive set-up costs.

Standardized Master Batch Records (MBR's) and complete documentation are provided with material traceability and reconciliation.

- Labeling/re-labeling, secondary packaging, and kitting can be accomplished to meet the following requirements:

- All sizes and types of containers
- Temperature considerations
 - Controlled Temperature Requirements – CRT, and operations can be performed in a 2-8°C environment if necessary
 - Time Out of Refrigeration (TOR) tracking
- Label creation
 - Customized label creation using controlled, 21 CFR compliant, validated label software
 - Adhesives and label stock for room temperature, 2-8°C, and cryogenic application and storage needs

- Additional support includes:

- Custom secondary packaging, informational inserts, tamper seals available
- Storage offered prior to or after completed operations in **15-25°C, 2-8°C, -20°C, and -80°C** environments
- Controlled temperature shipping available
- Materials handling (receipt, storage, shipment)
