

Singota Services Summary

Singota Solutions is a Contract Development and Manufacturing Organization (CDMO) focused on moving pharmaceutical, animal health, and biotechnology products through the drug development pipeline faster—with agility, accountability, and transparency.

Formulation and Analytical Development

- Technology/method transfer
- Method qualification
- Thermal characterization
- Particle size reduction
- Lyophilization

Testing Services

- Raw material testing—compendial and other QC release test methods for identity and CoA's
- Release and stability testing (ICH)
- Analytical testing
- Transport simulation testing, thermal cycling & thermal excursion studies
- Material compatibility
- Degradation studies

Aseptic Filling

- Precise, automated, robotic filling
- Vials, syringes, cartridges
- Use of pre-sterilized, nested containers, and pre-sterilized, single use product contact materials
- Small volume runs

Finishing Services Supporting Clinical Trials

- Labeling, re-labeling
- Kitting
- Packaging & inspection

Supply Chain Management

- Sampling and dispensing capabilities for bulk material forms (liquids, powders, tablets)
- Distribution and storage of APIs, finished goods, hazardous materials, CIII-CV substances
 - Available storage conditions include: **15-25°C, 2-8°C, -20°C, -80°C**
- Clinical trial support and material distribution
- Expertise in temperature-controlled materials management and distribution practices
- Secure, controlled environments and validated systems
- Client accessible material management software

Focused on Faster
