

# International Supply Chain Management

*Focused on Faster*

## Features of utilizing Singota's International SCM services include:

- **Cost Savings** - Material will be identified as "in transit" and therefore not subject to taxes while being stored in the open bonded warehouse. Additional savings of Value Added Tax (VAT) in EU countries can be applied in some cases.
- **Risk Mitigation** - Clients can reduce risk and save valuable time by eliminating the need to ship materials to the US to be returned overseas when needed.
- **Logistics Support** - Expertise in managing transport and clearance in the EU.
- **Streamlined Communication** - Clients have a dedicated project manager at Singota to ensure operations are completed on time and as requested. In addition, clients utilizing any of Singota's SCM services can seamlessly monitor and manage their materials at any time using Singota's web-based E-Transparency® system.

## European Material Storage, Staging, & Logistics

Clients can take advantage of Singota's designated European depot for International storage and sampling/dispensing services. Clients of Singota can store materials in our approved partner's open bonded warehouse in Switzerland at storage conditions including 15-25°C, 2-8°C, -20°C, or -80°C. In addition to storage and shipping, services are available to aliquot specified weights or volumes of materials into appropriate containers for testing or manufacturing purposes.

## Example scenario when utilizing Singota's International Supply Chain Management services:

### Situation

Client has bulk API manufacturer in China and needs a smaller amount aliquoted and sent to DP manufacturer in Spain.

### Solution

Client ships and stores bulk API at Singota's European depot. Client then requests amount to be aliquoted to DP manufacturer through Singota's secure E-Transparency website.

### Results

Reduced risk to materials while the client saves time and cost by paying VAT only on aliquoted amount or not at all, if applicable.

## Importer of Record (IOR)

Singota assists clients with International supply chain services by providing importer of record assistance.
